

# BEAM FOR UNLOADING GLASS BOXES AND GLASS PACKAGES

Kod produktu: OF731.00B

Data: 03.07.2026

[www.melka.com.pl](http://www.melka.com.pl)

The beam for unloading glass crates and glass packages OF731.00B is a reliable tool that enhances efficiency and safety when handling heavy loads up to 2500 kg. Thanks to its robust construction and compatibility with cranes or forklifts, it facilitates precise and stable lifting of glass packages, minimizing the risk of damage. Optional straps designed for various package dimensions further improve load organization and security during unloading.

Technical data:

Overall length: 2980 mm

Load capacity: 2500 kg

Weight: 130 kg

The beam structure allows for use with a crane or forklift.

It is possible to equip the beam with straps enabling the unloading of glass packages.

We offer straps for packages with dimensions of 3210x225 and 3210x255 mm.
