The MELKA suction lifter is a reliable solution for handling flat glass and thermal insulation packages with a load capacity of up to 540 kg. Equipped with six suction cups and two safety circuits, it guarantees stability and protection during operation. Thanks to its ergonomic rotation and tilt functions, it improves workflow, increasing the efficiency and safety of operations.

Type	Load capacity (kg)	Number of suction cups	Min glass dimension (mm)	Dimension (mm)	Weight	Rotation	Tilt
WD-07E	540	6	750x1100	750x1100x450	66	manual	none
WD-07F	540	6	750x1100	750x1100x350	67	manual	manual
WD-07G	540	6	750x1100	750x1100x600	115	manual	electric
WD-07H	540	6	750x1100	750x1100x660	130	electric	electric

- The devices are equipped with two safety circuits
