The MELKA suction lifter is a reliable solution for safely handling flat glass and thermal insulation packages. Equipped with 12 suction cups and double safety circuits, it guarantees a stable grip and material protection during transport. Thanks to its ergonomic rotation and tilt functions (depending on the model), it improves workflow and increases operational efficiency.

Type	Load capacity (kg)	Number of suction cups	Min glass dimension (mm)	Dimension	Weight (kg)	Rotation	Tilt
WD-07L	1080	12	1100x1400	1100x450x450	96	manual	none
WD-07M	1080	12	1100x1400	1100x1400x600	155	manual	electric
WD-07N	1080	12	1100x1400	1100x1400x660	170	electric	electric

- The devices are equipped with two safety circuits
