

Press for inspecting and glazing PVC windows

Kod produktu: PS-04A

Data: 03.07.2026

www.melka.com.pl

The PS-04A press is a reliable device for inspecting and glazing PVC windows, ensuring precise alignment of elements at right angles. Its robust construction and pneumatic pressure guarantee stability and safety, while the adjustable pressure allows for efficient organization of the installation process. Durable guides and protective strips ensure smooth and damage-free transport of windows.

Technical data:	PS-04A
Total length:	3600 mm
Overall width:	950 mm
Total height:	2450 mm
Working length:	2800 mm
Working width:	150 mm
Working height:	2200 mm

Description:

- The glazing and window inspection press aligns the window element to a right angle.
- The solid base construction guarantees great stability.
- Durable guides with low movement resistance are made of hardened and ground rollers on which a movable pressure strip mounted on thrust bearings moves.
- The force of the mounting strips is regulated by means of a pressure regulator with a

manometer.

- The left support beam is tilted manually.
- The right beam is pneumatically pressed.
- Permissible load of roller guides 200 kg.
- Polyamide strips or felt tape allow for easier transport of the window.
