

# Press for inspecting and glazing PVC windows

Kod produktu: PS-03S

Data: 03.07.2026

[www.melka.com.pl](http://www.melka.com.pl)

The PS-03S press for inspecting and glazing PVC windows is a reliable device that ensures precise squaring of window elements. Its robust construction and pneumatic pressure adjustment guarantee safe and stable operation, while durable guides minimize movement resistance, streamlining the production process. Ideal for efficient and safe glass installation in PVC windows.

Technical data:	PS-03S
Total length:	3600 mm
Overall width:	950 mm
Total height:	2510 mm
Working length:	2600 mm
Working width:	150 mm
Working height:	2200 mm

#### Description:

- The glazing and window inspection press aligns the window element to a right angle.
- The solid base construction guarantees great stability.
- Durable guides with low movement resistance are made of two hardened and ground rollers on which a movable pressure strip mounted on thrust bearings moves.
- Stepless pneumatic height adjustment up to 500 mm using proven linear drive technology.

- The force of the mounting strips is regulated by means of a pressure regulator with a manometer.
- The left support beam is tilted manually.
- The right one is not tilted but pressed pneumatically (the press is impassable).
- Permissible load of roller guides 200 kg.
- Polyamide strips or felt tape allow for easier transport of the window.
