www.melka.com.pl

The MELKA window inspection and glazing press is a reliable device that ensures precise, squaring of window elements. Its robust construction and durable guides with linear bearings guarantee stability and smooth operation, while the adjustable pressure and infinitely variable height adjustment increase comfort and safety. Thanks to innovative solutions, working with windows becomes more efficient and ergonomic.

NOTE: RUN-TO-RUN-PRESSURE MOUNTING STRIP IS STANDARDLY RIGHT-SIDED

Description:

- The glazing and window inspection press adjusts the window element to a right angle.
- Both window mounting strips are hidden below the plane of the vertical frame, making it easy to move the window.
- The solid base construction guarantees great stability.
- Durable guides with low movement resistance moving on two hardened shafts with running mechanisms - linear bearings.
- Stepless height adjustment up to 500 mm using proven linear drive technology.
- The force of the mounting strips is regulated by means of a pressure regulator with a manometer.

- Activation of the pneumatic switch at the height of the sliding pressure strip holder.
- Permissible load of roller guides 200 kg
- Polyamide strips or felt tape allow for easier transport of the window.
