

Assembly rack for cut PVC profiles

Kod produktu: RG-01A

www.melka.com.pl

Data: 03.07.2026

The RG-01A assembly rack is a reliable solution for storing cut PVC profiles, streamlining workflows in glass and window shops. With 40 optimally sized compartments, it enables safe and ergonomic storage of components, minimizing the risk of damage and accelerating the assembly process. Its robust construction ensures stability and durability in everyday use.

Technical data:	RG-01A
Total length:	3500 mm
Overall width:	1000 mm
Total height:	1510 mm
Number of compartments:	40 pcs.
Partition length:	400 mm
Partition height:	190 mm
