

## Soft coating sanding table

Kod produktu: ST-09A

Data: 03.07.2026

[www.melka.com.pl](http://www.melka.com.pl)

The MELKA ST-09A soft coating sanding table is a precision device designed for mechanically removing delicate coatings from the edges of glass panes. Equipped with an efficient fan with an air cushion and vacuum function, it ensures stability and easy material movement, increasing work safety and efficiency. Its versatile design allows for integration with other auxiliary tables, optimizing workspace organization.

Technical data:	ST-09A
Total length:	2000 mm
Overall width:	1000 mm
Total height:	850÷950 mm
Disc rotation speed:	1350 rpm
Dial diameter:	? 180 (stone for soft coatings)
Type of grinder feed drive:	manual

### Description:

- The grinder is used to mechanically remove soft coatings from the edges of the glass.
- The head moves along a special, precisely made guide, ensuring precise operation of the entire device.
- The table is equipped with a high-performance centrifugal fan which, thanks to a pneumatic valve, can be used in two ways: to create an air cushion that facilitates the movement of the glass,
- to create a vacuum that holds the surface in place during grinding,

- Thanks to its universal design, the grinder can be used with any other auxiliary table.
