Description:

The drawer storage cabinet is designed for storing glass in boxes on the lower level. It is designed to store a large amount of glass in a small space while providing convenient access to the stored glass. The compartments can be combined as needed.

The storage cabinet consists of the following elements:

- Cabinet structure with grate and tracks,
- Six drawers moving on tracks (rails),
- Each drawer is equipped with a handle and wheels, the handle is used to pull out and push in the drawers.
