Data: 03.07.2026

The MELKA SL-10B belt sander is a reliable device for precise grinding and polishing of flat glass edges. Equipped with a water cooling system and a roller bar, it enables safe and ergonomic work with glass panes at various angles, increasing efficiency and processing quality. Its robust design and ease of use guarantee optimal organization of the production process.

Technical data:	SL-10B
Total length:	900 mm
Overall width:	650 mm
Total height:	1700 mm
Libra:	200 kg
Endless belt dimensions:	100x1870 mm
Circumferential speed of the working belt:	12/23 m/sec.
Supply voltage:	400V
Power:	2.2 kW

Description:

- The construction of the above-mentioned grinder is hot-dip galvanized and powder-coated,
- The belt sander allows for sanding the edges and rims of flat glass (forms),
- The roller strip facilitates the movement of the glass in a straight line and at an angle of 22.5

degrees and 45 degrees,

- The device has a closed-circuit water cooling system - water tank capacity: 30 liters
- The grinder is ready to be connected and started,
- By changing the belt, the device can be used as a polisher,
